# more like ris-wont

*this is no time for bad jokes!*

### do you feel like bothering a tech?

### the riso won't...

### show my print on preview.

### is it a light print?

*is #EFEFEF light?*

**zoom in on preview. it's probably there.**

### is it a JPEG or PDF?

*its a new file format you probably never heard of.*

**cloudconvert.com is pretty handy.**

### does it have numbers, space, special characters, etc. in the file name ?

ʕ╱•ᴥ•ʔ╱ ︵ ┴━┴ .pdf

**keepitvanilla.jpg**

### have you tried printing from a different program?

### photoshop?

### preview?

### acrobat?

### is the file located on the hard drive?

*i am printing from Chrome preview.*

**move files to the work in progress drive.**

### is the paper size correct?

*i ran out of jokes.*

**make sure the paper size is set in the print dialogs.**

### is the coloring setting correct?

*the wut?*

**see gate fold.**

### did you turn it off and on again?

*hello. IT. have you tried turning it off and on again?*

**the power switch is next to the receiving tray. *Switching too fast won't allow the riso to properly power cycle!***

### did you make a goat sacrifice?

*one lot for the Lord and the other lot for Azazel.*

**it was a joke.**

### feed the paper correctly.

### is it paper?

*...*

***i'm just sayin' you'd be surprised...***

### is the paper dry?

### is the paper really thick or thin?

*it IS four-ply toilet paper.*

***see gate fold for how to adjust paper feeding dials for different weights of paper.***

### did you wipe the feed roller?

*i knew this toilet paper would come in handy!*

***take a dank paper towel and wipe the roller.***
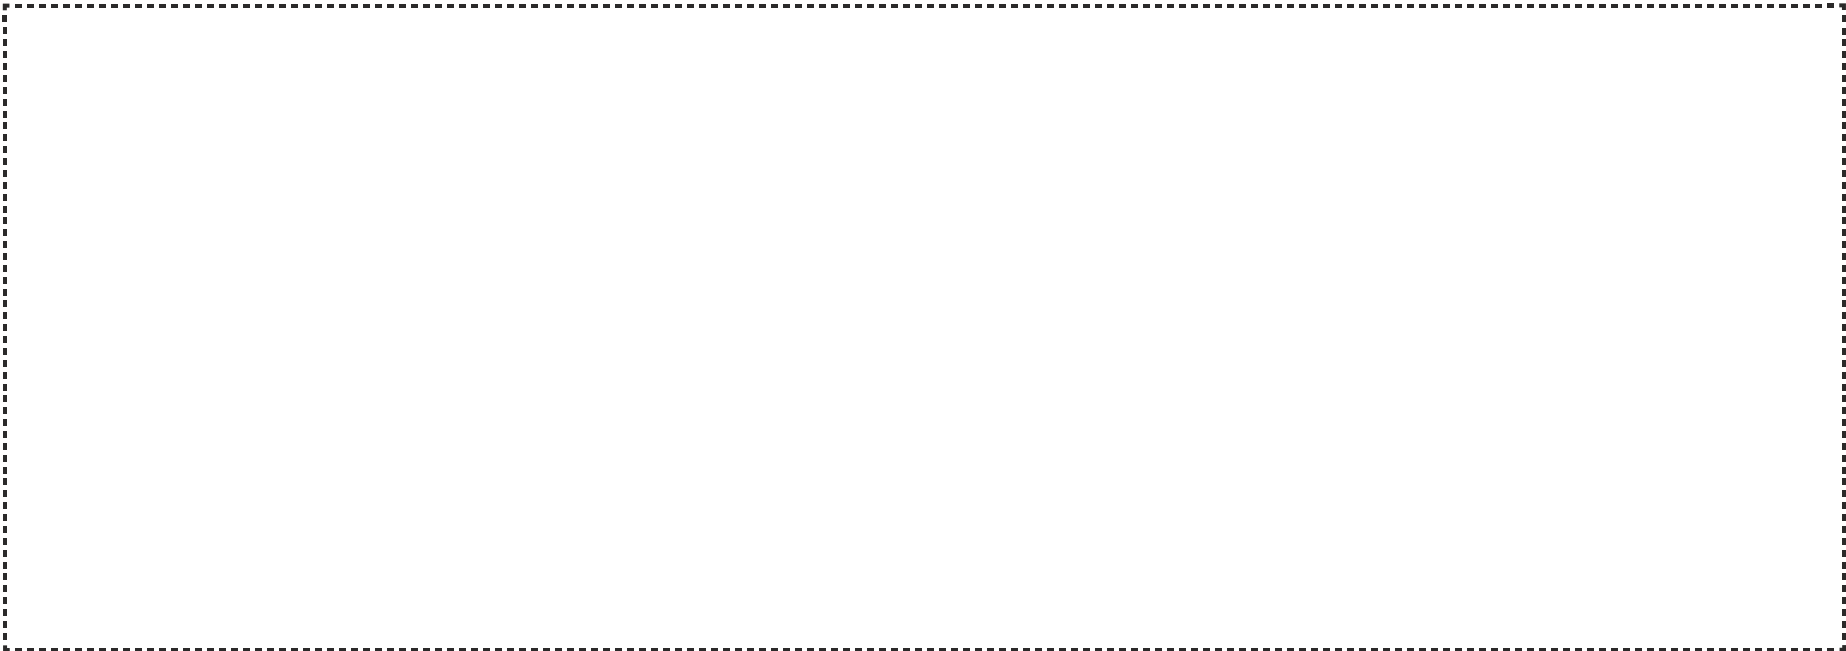

### ask a tech for help! if none of these worked, the riso might need a memory reset.
